The Ayala Museum is an art and history museum located in the heart of the Makati Central Business District, Philippines.

The museum began in the 1950s as a vision of the artist Fernando Zobel. He dreamed of a museum dedicated to Philippine history. In 1967, a museum of Philippine history and iconography was established. Later, in 1974, 60 hand-carved dioramas showing milestones of Philippine history were completed. This project was led by Carlos Quirino, National Artist for Historical Literature, and Ayala Museum’s first director. To this day, many Filipinos visit the Ayala Museum to enjoy and learn from the dioramas. (Did you know you can also visit the dioramas online via Google Arts & Culture? Simply search “Google Arts and Culture: Ayala Museum” to find out more!)

Apart from the dioramas, scale models of various ships that plied Philippine waters throughout history were also built. From pre-colonial boats, Chinese junks to Spanish galleons, these maritime vessels show a long history of trade, migration, and conquest in our archipelago.

Coming into the 21st century, the Ayala Museum’s collections have grown to include many awe-inspiring archeological artifacts featured in the exhibition, Gold of Ancestors: Pre-Colonial Treasures in the Philippines, a testament to the Filipinos’ rich ancestry and inherent craftsmanship. Ayala Museum also features ninth to 19th century Asian trade ceramics from the Roberto T. Villanueva Foundation Collection in the exhibition A Millennium of Contact. There are many more to see inside the Ayala Museum, and while the building is currently under renovation, these collections are made available online.
About ARTIFACT ADVENTURE

There are different artifacts from the Ayala Museum collection, but where did they come from? This module helps kids discover the locations where these objects were found in various parts of the Philippines, while learning ways of how explorers went on adventures today and in the past. Make your learning experience more fun by playing the Artifact Adventure boardgame!

This activity is recommended for kids ages 10 to 12 years old.

1. Learn about our artifacts and their interesting stories.
2. Study basic geography concepts and try new skills like map reading and following directions.
3. Prepare your game setup by printing and cutting the game board and standees.
4. Play Artifact Adventure with your family and friends.
5. Share your experience with us! Tag us in a photo or a video!

LEARN MORE ABOUT THE AYALA MUSEUM COLLECTION:

Ayala Museum website: [www.ayalamuseum.org](http://www.ayalamuseum.org)

MEET THE EXPLORERS!

In every adventure, there are different kinds of explorers. Each one has an important task to help the team reach their destination!

Hi! I’m Hiwaga or Aga for short. My name means “mystery”. As the Seeker, I’ll be in charge of spotting new discoveries as we head to our destination!

My name is Lila! That’s my nickname for Liwanag, meaning light in Filipino! Are we headed to some place dark? Don’t worry! As the Lightkeeper, I’ll make sure we can still see where we’re going!

Hello! Guni here, which is short for Gunita, a Filipino word for “memory”. I’m sure this will be a memorable experience! As the Chronicler, you can count on me to document all the fun!

You can call me Tala. My name means “star”. Did you know that explorers from the past relied on stars to know which way to go? As the Navigator, I’ll use this handy compass to help us know the right way!

Aga the Seeker
Lila the Lightkeeper
Guni the Chronicler
Tala the Navigator
WHAT IS A MUSEUM?
According to the International Council of Museums, a museum is a non-profit, permanent institution in the service of society and its development, open to the public, which acquires, conserves, researches, communicates, and exhibits the tangible and intangible heritage of humanity and its environment for the purposes of education, study, and enjoyment.

WHAT IS AN ARTIFACT?
An artifact is any man-made object. Artifacts can be of great interest to historians, archaeologists, and even regular people because they reveal stories about a particular place, event, society, or time period. They can often be found exhibited in a museum.

WHAT IS GEOGRAPHY?
According to the National Geographic Society, geography is a study of the relationship of people and their environment. It deals with the physical features of our planet, from the different bodies of land and water, and how human beings came to inhabit, navigate, and use them.

WHAT ARE PRIMARY AND SECONDARY DIRECTIONS?
Primary or cardinal directions are the four main points that you see on a compass. These are north, south, east, and west. On the other hand, secondary directions are those in between the primary directions. These are northeast, northwest, southeast and southwest. They are positioned as follows below:
There are many simple activities you can do to help kids learn about following and giving directions. Some sample activities can be found in this module.

A DAY IN MY NEIGHBORHOOD

You Will Need:
- A map of your neighborhood (page 7)
- Explorer cutout (page 20)

General Instructions:
- Print and use the map from page 7.
- Cut out an explorer from page 20.

MINI ACTIVITY #1: FOLLOWING DIRECTIONS

Instructions: Place your explorer on the first location mentioned on each number. Follow the next set of instructions until you reach the last stop. Write your location on the blank provided.

1. From the playground, go south to the gas station. Turn west towards the church. Head south to the basketball court. What is the building at the west?

2. From the theme park, move east towards the office. Keep moving north until you reach the gas station. Head west towards the church. What is the building at the north of the church?
MINI ACTIVITY #2: GIVING DIRECTIONS

Instructions: Write a set of directions for how to go from point A to point B.

STEP 1: Determine the primary or secondary directions the explorer should follow.

STEP 2: Indicate the number of steps they need to take. Each step is equal to one broken line on the street.

STEP 3: Name landmarks they pass along the way.

1. How do I get from the school to the home?
   
   First, walk ________ steps to the ________ where the ________ is.

   Then, take ________ steps to the ________ until you reach the ________.

   Lastly, go ________ steps to the ________ and you will arrive at the basketball court!

2. How do I get from the office to the church?

   First, walk ________ steps to the ________ where the ________ is.

   Then, take ________ steps to the ________ until you reach the ________.

   Lastly, go ________ steps to the ________ and you will arrive at the office!
Welcome, explorers! You are about to embark on a journey to different places in the Philippines to discover where artifacts from the Ayala Museum collection were found. Your knowledge on basic geography and Philippine history will surely help you along the way.

You will need:
- 2 to 4 players
- A map of the Philippines (page 18 and 19)
- A die (page 20)
- Explorers (page 20)*
- Artifact standees (page 21)*
- Adventure cards (page 22 to 25)

*Recommendation: Use 100-200 gsm paper or use regular paper and glue it on a folder or cardboard to make the standees sturdy.

MECHANICS

Before each game:
1. Each player will choose an Explorer. Their starting position is on any of the four corner blocks on the map with footprints. Only one Explorer can stay on each corner.
2. Shuffle the adventure cards and stack them in a deck face down.
3. Place the 10 artifact standees on their respective places of origin in the map. If you do not know where they came from, review your study guide!
4. Determine who goes first. Each player will roll the die. The player who has the highest number goes first, followed by the one with the next highest roll, and so on and so forth.
Gameplay:

1. Each player will begin their turn by tossing the die to determine how many steps their Explorer will take. The CATCH: you can only move ONE direction per turn (you can choose to move up, down, left, right, or diagonally).
2. If you land on an unmarked block, your turn ends.
3. If you land on a box with a star (☆), choose a card from the deck. It will either be a question or a set of instructions. If you answer the question or perform the instructions correctly, you can roll the die again to move your Explorer forward one more time. If you answer or perform incorrectly, your turn ends, and you cannot play in the next turn.
   
   * If you pick a card with a skull (💀), you end your turn immediately after performing the action (you won’t roll the die to move your Explorer forward).

4. If you successfully land on a block with an artifact, you can collect the standee. Once the standee has been collected, the block will become unmarked.
5. If, at the end of your move, you land on another player, you can choose to move his or her Explorer by one block in any direction. You can also choose not to.

   * If the displaced Explorer is moved to a box with a question mark (?), his or her player will begin their next turn by picking a card instead of tossing the die.

6. The game ends when a player has collected majority of the artifacts and is declared the winner.

   Alternatively: You can choose to finish the game after all the artifacts have been collected, and the player with the least artifacts receives a punishment chosen by the other players.
This is an object information guide for you, Parents/Teachers!

<td>1</td>
<td><strong>Virey model</strong>&lt;br&gt;144 x 75 x 95 cm&lt;br&gt;Ayala Museum Collection</td>
<td>The <em>virey</em> or <em>biray</em> was a local form of transport used by traders from the Cagayan and Ilocos regions. Though it was described as an “unsteady” vessel that only traveled near the shore, <em>virey</em> were used to transport cotton, textiles, and even surplus rice from Ilocos to Manila during dry months.</td>
</tr>
<tr>
<td>2</td>
<td><strong>Koton</strong>&lt;br&gt;Men’s Shirt&lt;br&gt;Cotton, tassels, glass and ceramic beads&lt;br&gt;48.5 cm width; 34.5 cm shoulder to hem&lt;br&gt;Ayala Museum Collection&lt;br&gt;Gift of Mercedes Zobel</td>
<td>The <em>koton</em> is a shirt worn by men of the Gadang indigenous group in Northern Luzon. It shows a typical pattern of maroon, red, black, and white stripes. Tassels, glass and ceramic beads are added for ornamentation and indication of status.</td>
</tr>
<tr>
<td>3</td>
<td><strong>Puente Colgante de San Miguel. (y Album)</strong>&lt;br&gt;Hanging bridge of San Miguel. (and album)&lt;br&gt;Jose Honorato Lozano&lt;br&gt;1850-1851&lt;br&gt;Watercolor on paper&lt;br&gt;Ayala Corporation Collection&lt;br&gt;On long-term loan to Ayala Museum</td>
<td>Towards the end of 19th century, Jose Honorato Lozano (1821-1885) produced <em>letras y figuras</em> (letters and figures) in watercolor. Human figures and daily scenes are positioned to form letters of phrases and names against various Philippine landscapes. This one shows a view of the <em>Puente Colgante</em>, a suspension bridge connecting Quiapo and Ermita across the Pasig River during the 19th century. It was replaced by what is now the Quezon Bridge.</td>

Iron-spotted boat with rider figurine
Possibly Cizao, Fujian
14th century
Roberto T. Villanueva Foundation Collection
On long-term loan to Ayala Museum

ARTIFACT LOCATION: MINDORO

This boat-shaped figurine with iron-spotted decorations shows the affinity of our ancestors with sea travel. It was found on an island two hours away from the nearest island of Mindoro by boat. Ceramic figurines found in grave sites throughout China and Southeast Asia present clues to the lifestyle and values of our ancestors.

**Two pesos**  
Provincial Emergency Currency Board  
Series 1942  
Ayala Museum Collection  
ARTIFACT LOCATION: NEGROS OCCIDENTAL

This emergency currency note, issued in 1942 shortly after the declaration of Manila as an open city, bears the face of Filipino President Manuel L. Quezon. The red seal and watermark throughout the note bear the phrase “Commonwealth of the Philippines,” a reminder that Quezon’s government was under the United States of America.

### OBJECTS FOUND IN MINDANAO

<table>

<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>8</td>
<td><strong>Kinnari</strong></td>
<td>In Hindu mythology, the half-human, half-horse creature called Kinnari represents the traditional feminine attributes of beauty, charm, poise, and elegance. When adapted in Southeast Asia, the half-horse creature became half-bird. This piece, likely used as a liquid pourer, is made of solid gold, and bears the features of a Filipino woman’s head.</td>
</tr>
<tr>
<td>9</td>
<td><strong>Sarimanok</strong></td>
<td>The sarimanok is a mythical bird in Maranao culture and lore. This iconic bird is often depicted with colorful plumage and a fish attached to the beak. It features many curvilinear forms called <em>okir</em> design which is very often seen in Maranao art and pre-dates the arrival of Islam.</td>
</tr>
<tr>
<td>10</td>
<td><strong>Pis syabit</strong></td>
<td><em>Pis</em> is the Tausug term for headcloth and <em>syabit</em> means “to hook,” which describes the way the threads are woven. Characterized by intricate geometric designs and vibrant colors, the <em>pis syabit</em> is worn by men only and is one of the cultural symbols of Tausug people. It reflects the concept of sacred geometry in Islamic design.</td>

GLUE THIS SIDE TOGETHER WITH THE FIRST HALF OF THE MAP.
DIE

Cut this die template and fold it so you can form a cube. Glue the flaps so it stays together. Roll the die to determine how many squares you can move for each turn.

EXPLORERS

You can use these explorers for the mini activity and the Artifact Adventure game!

They will represent where you are in the game board. Just follow the lines to cut out each one, then place them on their stand.

ARTIFACT STANDEES

Follow the lines to cut out each object, then fold them to stand up!

Place each standee over the box on the map with the same letter as the one indicated on its bottom flap.

ADVENTURE CARDS

Cut these adventure cards and stack them to form a deck. Make sure they are faced down. When you land on a block with a star (☆), pick a card.

There are different kinds of card in the deck:

- IDENTIFICATION
- DIRECTION
- SEARCHING
- ACTION
- PUNISHMENT

1. Name the three main island groups of the Philippines.

2. I am a flat piece of paper that can show you what a place looks like. What am I?

3. I am round, and I have arrows. I can help you know which direction you are facing. What am I?

4. I am shaped like a ball and I can show you what the Earth looks like. What am I?

5. What direction is this?

6. What direction is this?

7. What direction is this?

8. What direction is this?

9. What direction is this?
10. What direction is this?

11. What direction is this?

12. What direction is this?

13. I am an artifact you can find on the map. I sail near the shores of Ilocos region. What am I?

14. I am an artifact you can find on the map. I came all the way from China and there are spots all over me. What am I?

15. I am an artifact you can find on the map. I am a painting of a bridge that connected Quiapo and Ermita during the Spanish Period. What am I?

16. I am an artifact you can find on the map. I am huge and you can put religious images on me. What am I?

17. I am an artifact you can find on the map. I am a mythical bird of the Maranao indigenous group. What am I?

18. I am an artifact you can find on the map. I am a banknote printed in the Negros Occidental during World War II. How much is my value?

19. I am an artifact you can find on the map. My design is inspired by the symbol of the Hindu god Shiva. What kind of accessory am I?

20. I am an artifact you can find on the map. I am the traditional head covering of the Tausug. What am I?

21. The Kinnari is half human, half ______?
